- Updated a Python web application with Flask for a client with 100+ users
- Performed consulting work and guided clients on the how-to's regarding Amazon Web Services

## Testimonials / Reviews

### Via Upwork.com

Alexander B.,  
Chief Technology Officer  
at Glass Compliance Inc.

"We hired Blane to work for a fintech platform hosted on glasscompliance.com, and in brief he has been an absolute rockstar! Blane performed several functions for this institution; He was our customer support lead, software developer, and account ambassador. He was able to handle several customer support issues with ease, we had nothing but great reviews from our clients about his performance. He also contributed tremendously to our platform source code, his additions have been stellar, many of which have been merged into our production code. Lastly, he was able to conduct many incredibly thorough application demonstration to potential clients, a lot of these opportunities have converted into active clients. 10 out 10 stars, would recommend!"

Christian Ott

"Blane is a great freelancer. He communicates well and is very responsive to requests. He helped me out with a larger Python/Flask project that needed some additions. I'll definitely hire him again."

Nathan G.

"- got on a zoom call, so we could chat and work together  
- very knowledgeable for me related to python, code deploying and shipping best practices  
- pointed me in the direction of AWS, and helped me set it up which greatly simplified my code shipping process"

Brett W.

"Blane was an absolute pleasure to work with. He helped create an awesome custom real estate website for me, and I am going to continue using him to update content, blogs, and Youtube. If you need help with anything web-related, make sure to hit him up and use his services! Highly recommend."
